PROFESSIONAL PROFILE

Software engineer with a background in Computer Engineering and Digitalization from EMI. Hands-on experience in backend development, DevOps, observability, QA automation, and payment platforms. Contributed to API development, monitoring migrations, test automation, and enterprise customer support at Oracle. Focused on reliable, maintainable solutions and collaborative delivery in Agile teams.

EXPERIENCE

Oracle

APIGW Team · Observability

- Migrated the team's monitoring solution from Elasticsearch- and Prometheus-based tooling to Oracle's internal Telemetry services.
- Developed scripts for metric collection and data streaming into Telemetry for ingestion, monitoring, and analysis.
- Created Grafana dashboards and alarms to improve operational visibility and incident detection.

Oracle

Payment Team · APIs & QA automation

- Automated API and platform testing with Selenium, Rest Assured, and Appium to expand validation coverage and reduce manual testing effort.
- Contributed to APIs for payment request validation and payment gateway integration; worked across multiple payment methods and transaction flows.
- Supported enterprise payment customers and built lightweight internal tools to simplify testing workflows and API understanding.
- Contributed to early design and implementation work with Redis and Kafka to evaluate support for increasing transaction volumes.

ANFCC

Development & Maintenance Intern

Jul-Aug 2023 · Rabat

- Worked on web and mobile applications in an Agile environment, from planning and design to implementation and testing.
- Used C#, Ionic, Postman, IIS, SQL Server, Python, UML, and Figma.

Cheikh Zaid Foundation

IT Services Intern

Jul-Aug 2022 · Rabat

- Contributed to a web and mobile application with chatbot support, from planning and modeling through development and testing.
- Developed practical skills in software design, collaboration, and the full development lifecycle.

Imad Chakir

Software Engineer | DevOps | QA Automation

TECHNICAL SKILLS

Programming	Python, Java, C#, JavaScript, Bash, SQL
Backend & APIs	Spring Boot, ASP.NET / .NET, Node.js, Express.js, REST APIs, Rest Assured
DevOps & cloud	Docker, Terraform, Ansible, Jenkins, GitLab CI/CD, Linux
Observability	Grafana, Prometheus, Telemetry, monitoring dashboards, alarms
Testing & QA	Selenium, Appium, Postman, API automation, platform testing
Data & tools	MySQL, PostgreSQL, MongoDB, Redis, Kafka, Git, Jira, IntelliJ, Power BI

SELECTED PROJECTS

Investment Portfolio Platform

Built an investment management platform supporting portfolio monitoring, recommendations, performance and risk evaluation, and tax reporting.

Power BI · Python · MySQL · Microsoft Azure · OAuth · C# · Angular · .NET

Voice-enabled Weather

Developed a weather application supporting both typed and voice-based queries, combining web services and speech recognition.

Angular · Spring · Node-RED · Express.js · MySQL · Tailwind · Java · ActiveMQ · Mosquitto · Whisper

Facial Expression Recognition

Developed a desktop application for real-time emotion detection from images, videos, and live streams using the FER2013 dataset.

Python · TensorFlow · Keras · OpenCV · FER2013

Article Sharing Platform

Built a full-stack article platform with account creation, chatbot support, and article generation through web scraping.

React · Spring · MongoDB · Express.js · Python · Dialogflow

EDUCATION

Mohammadia School of Engineers (EMI) | 2021-2024

Engineering degree in Computer Engineering and Digitalization. Rabat, Morocco

Preparatory Classes · Mathematics & Physics | 2019-2021

MPSI and MP* studies. Rabat & Agadir, Morocco
